NATIONAL UNIVERSITY
OF COMPUTER & EMERGING SCIENCES
PESHAWAR CAMPUS

Problem Set:	Assignment 01	**Semester**:	Spring 2013
Points:	2		
Date Set:	February 11, 2013	**Due Date**:	February 18, 2013
Course:	CS206 Operating Systems	**Instructor**:	Nauman

- Install the open source Linux distribution Ubuntu 12.04 LTS on any machine of your choice.

- You may install any other version of Ubuntu (or any other Linux distribution) but the instructor will be using the above mentioned distro for the course. Any differences between your environment and the instructor's are yours to resolve.

- Use the software manager of your operating system to install the C Compiler (`gcc`).

    - For reference, to install `gcc` on Ubuntu 12.04, you may use the command: `sudo apt-get install gcc`

For submission, you should open the program called *Terminal* and write the following command:

```
echo YOUR_NUCES_ID ; gcc -v
```

replacing `YOUR_NUCES_ID` with your NUCES ID. Take a screenshot of the screen (using print screen button on your keyboard) and send the file to the course instructor.
